Overview

Objective

The objective of publishing this statistics is to encourage wider use and analysis of Income-tax data by Departmental personnel and academicians.

Methodology Adopted

The methodology adopted is as under:

- i. The template for statistics was prepared on the basis of previous statistics published by the Department and assessment of information available in various databases of the Income Tax Department.
- ii. The statistics have been generated from e-filed returns (digitally signed or where ITRV has been received) and paper returns captured in system upto 18th December 2014.
- iii. In cases where more than one return is submitted, the values in the latest return have been considered.
- iv. “Top 20 values” in each attribute of Statistics was reviewed to identify apparent data entry mistakes.
- v. The statistics were prepared after eliminating identified data entry errors, if any, in “Top 20 values”. As a result the count would be lower in some tables.
- vi. Various terms used in the statistics have been defined below respective tables.

Limitations

The statistics relating to sources of income have been prepared on the basis of values mentioned in e-filed returns and values captured from paper returns and the same may contain data entry errors on the part of the taxpayers/ return filers. Therefore, the accuracy of the statistics is limited by the accuracy of returns.

The values as quoted in/captured from the income-tax returns have been compiled. Only information in “Top 20 values” for each attribute of statistics was reviewed to identify apparent data entry mistakes, if any.

Disclaimer

Whilst the Income Tax Statistics have been prepared in good faith, it is not and does not purport to be comprehensive. Neither Income Tax Department, nor any of its officers or employees accept any liability or responsibility for the accuracy, reasonableness or completeness of, or for any errors, omissions or misstatements, negligent or otherwise, relating to the data or any representation or warranty, express or implied, with respect to the information contained in this Income Tax Statistics or on the data on which this Statistics is based and liability therefore is hereby expressly disclaimed.

Notes

1. Returned Income is the total income after chapter VI-A deduction as computed in the "Computation of total income" schedule of return of income
2. In cases where Total Income in the "Computation of total income" schedule of return of income is 0, the amount of losses of current year to be carried forward stated in the "Computation of total income" schedule of return of income is taken as Returned Income.
3. The "Sum of Returned Income" is the sum of Returned Income of all returns within the value range slab.
4. The "Average Returned Income" is the average Returned Income within the value range slab i.e. "Sum of Returned Income" divided by total number of returns within the value range slab.
